01

PROBLEM & OBJECTIVE

01 PROBLEM & OBJECTIVE

DYSLEXIA

- Letters may appear **distorted, rotated, or crowded**, making decoding difficult.
- Results in **slow reading, loss of focus, and increased frustration**.
- Complex layouts and dense text further **worsen the reading experience**.

OBJECTIVE

- To enhance and bridge the limitations of existing assistive reading tools by developing an AI-powered system that adapts to diverse learning needs

02

SOLUTION

Snap-to-Text + Summarization

Azure AI Vision to extract text
from images & **Azure AI
Language** condense key points.

Formal/Informal Conversion

Azure AI Language's to adjust
language style
(e.g., casual ↔ professional).

Voice Command Navigation

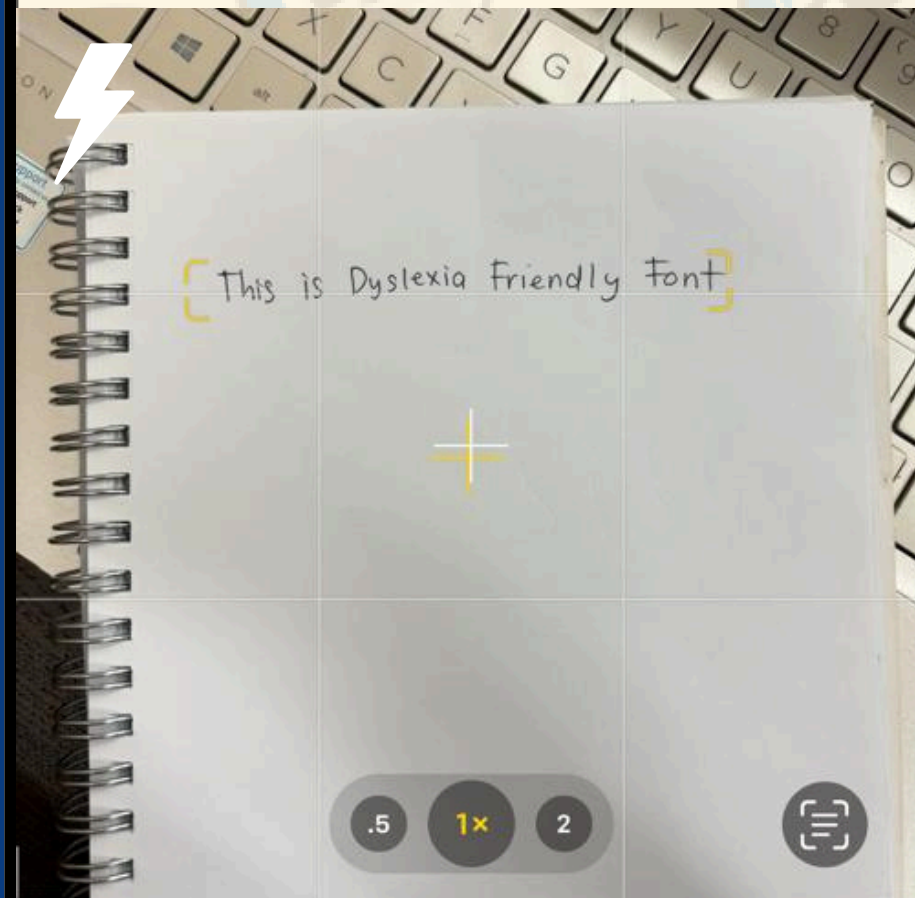

Control app hands-free
(like **Azure Bot Service**).

Text-to-Speech + Pronunciation Aid

Azure AI Speech's reads text
aloud & breaks down complex
words.

03 GO-TO-MARKET PLAN

COLLABORATION

KEMENTERIAN PENDIDIKAN

MARKETING & FINANCE

- Limited trial voice
- Limited text per prompt
- Limited photo/video per day

AWARENESS

- Social media
- Workshop at schools
- Partner with NGOs & education influencers

CONVENTIONAL VALUE

- Teacher guidance
- School trust
- Parental involvement

04 REAL -WORLD IMPACT

Users & Social Impact

- Helps dyslexic students learn independently.
- Reduces stigma with AI tools in classrooms

Economic Benefits

- Cut costs for special education (e.g., fewer students needed)
- Prepares users for jobs (e.g., email formalization)

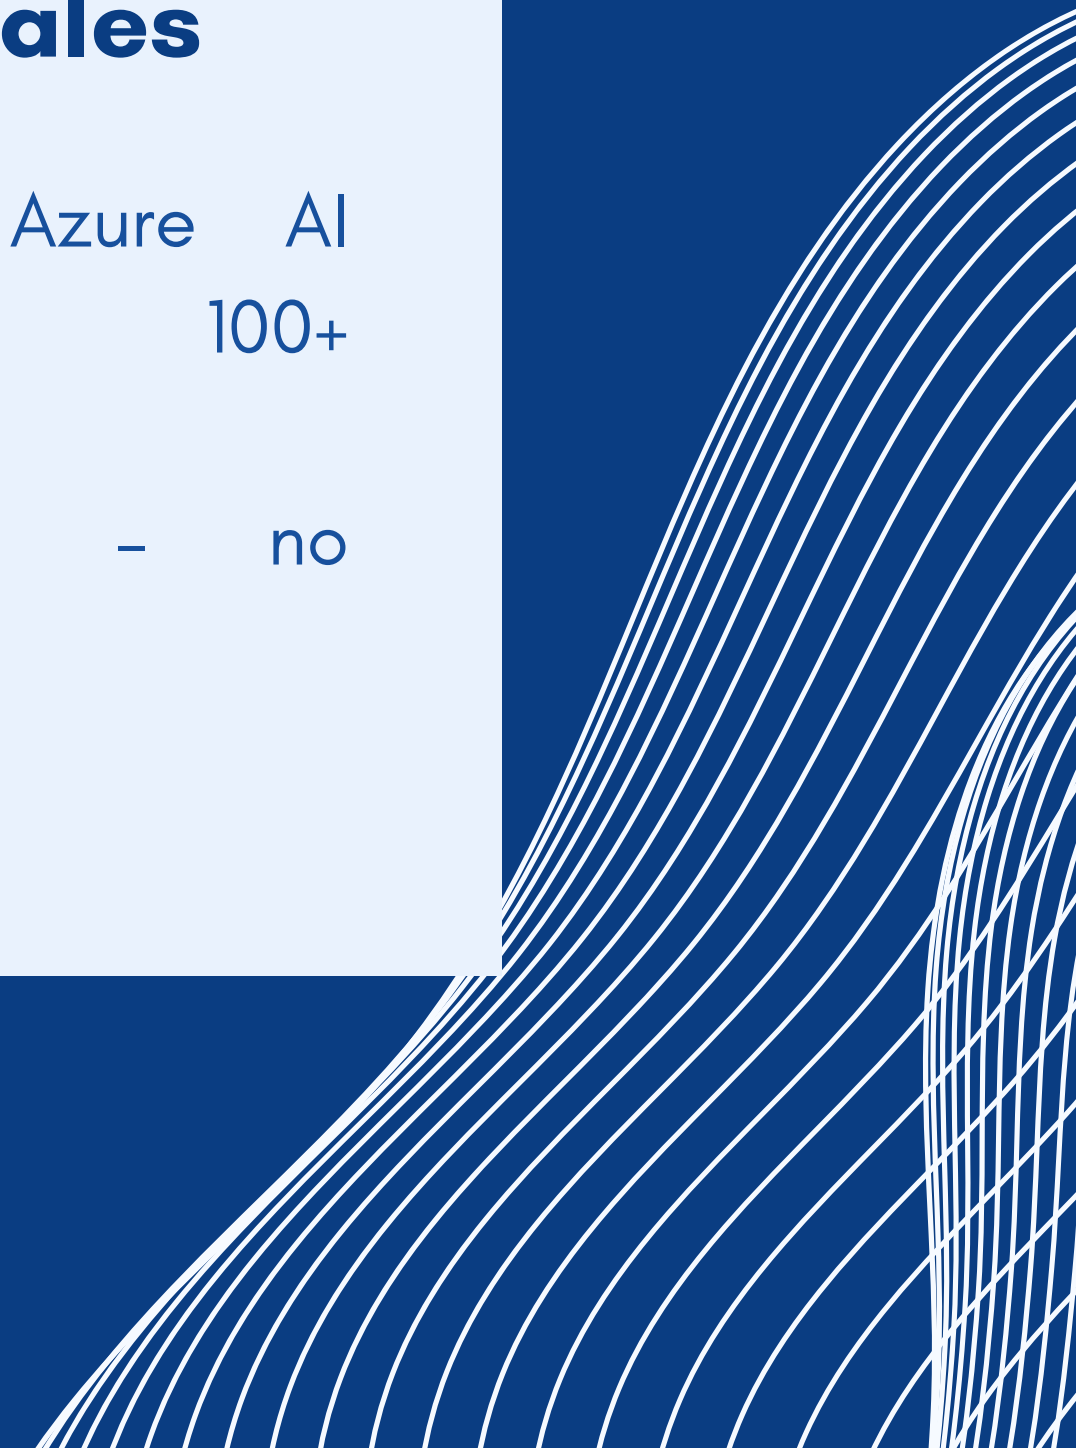

04 GLOBAL SCALABILITY

Expansion Plan

- **Malaysia:** Pilot in 50 PPKI schools.
- **ASEAN:** Add Bahasa Indonesia/Thai support.
- **Global:** Partner with NGOs (e.g., British Dyslexia Association)

Why It Scales

- Works on Azure AI (supports 100+ languages).
- Cloud-based – no device limits.
